SMSF Agentic System

High-Level Architecture & Use Cases

Prepared for: Management Presentation

Date: 30 March 2026

Status: Proposal

Confidentiality: Internal — CBA

1. Problem Statement

Customers want the control and flexibility of Self-Managed Super Funds (SMSFs) but struggle to get started and maintain them due to the complex setup process, extensive knowledge required, and significant time investment.

PHASE	TOP CUSTOMER PAIN POINTS
Research	Overwhelmed by information; no tailored guidance; unclear costs vs. benefits
Setup	Legal complexity (4–6 weeks); wet signature delays; expensive lawyer involvement
Account Setup	Rollover delays; contribution cap confusion; platform selection paralysis
Ongoing Management	Tax time stress; manual record-keeping; audit costs; regulation changes
Growth	Fear of wrong investment choices; property complexity (LRBA); market volatility
Retirement & Wind-Up	Pension regulation complexity; life event emotional burden; closure admin

2. Solution: SMSF Agentic System

An AI-powered multi-agent platform embedded within the **CommBank App** and **NetBank** that guides customers through the entire SMSF lifecycle.

Key Outcomes

12 AI Agents

6 MCP Servers

15+ Shared Tools

39 Journey Moments

METRIC	CURRENT STATE	TARGET STATE
SMSF setup time	4–6 weeks	**< 2 weeks**
Tax preparation effort	Days (manual)	**Hours (AI-assisted)**
Compliance breach risk	High (manual tracking)	**Low (real-time monitoring)**
Customer drop-off (setup)	~40%	**< 15%**
Time to first investment	Weeks	**Days**

3. High-Level Architecture

Architecture Summary

LAYER	COMPONENTS	COUNT
Agents	Supervisor (A0) + 11 Specialist Agents (A1–A11)	12
MCP Servers	ATO, CommSec, Banking, Doc Gen, Comms, RAG Vector Store	6
Shared Tools	Tax calc, compliance checker, risk profiler, OCR, e-signature, etc.	15+
External Systems	ATO, ASIC, Banks, Auditors, Legal, ESA	6

4. Agent Registry

ID	AGENT NAME	ROLE	JOURNEY PHASE
A0	Supervisor & Orchestrator	Routes requests, decomposes tasks, enforces quality gates	All
A1	SMSF Knowledge RAG Agent	RAG-powered Q&A with cited sources; advice boundary detection	All
A2	Suitability Assessment Agent	Interactive quiz, cost-benefit analysis, provider comparison	Research (M1–M6)
A3	Setup & Registration Orchestrator	Trustee registration, trust deed, ATO registration, e-signatures	Onboarding (M7–M10)
A4	Rollover & Contribution Agent	SuperStream rollovers, contribution automation, cap tracking	Account Setup (M15–M18)

A5	Investment Strategy & Portfolio Agent	Portfolio construction, drift detection, rebalancing, market response	Config / Ongoing / Growth
A6	Compliance & Record-Keeping Agent	Always-on SIS Act monitoring, automated records, regulatory alerts	Ongoing (always-on)
A7	Tax Preparation & Lodgement Agent	Auto-aggregation, financial statements, one-click ATO lodgement	Annual (M22)
A8	Audit Coordination Agent	Auditor matching, audit package prep, query management	Annual (M23–M24)
A9	Property Investment (LRBA) Agent	LRBA structuring, bare trust setup, property compliance	Growth (M32)
A10	Retirement & Pension Agent	Scenario modelling, pension automation, portfolio rebalancing	Retirement (M33–M35)
A11	Life Events & Wind-Up Agent	Death/illness handling, asset liquidation, fund closure	Wind-Up (M36–M39)

5. MCP Servers & Key Tools

ID	SERVER	PURPOSE	KEY AGENTS
MCP-1	ATO Integration	Registration, lodgement, compliance, SuperStream	A3, A4, A6, A7, A11
MCP-2	CommSec Trading	Trade execution, portfolio data, market data	A5, A9, A10
MCP-3	Banking & Accounts	Account opening, cash management, payments, LRBA lending	A3, A4, A5, A10
MCP-4	Document Generation	Trust deeds, strategies, wills, e-signatures	A3, A5, A9, A11
MCP-5	Communications	In-app notifications, email, SMS, ESA messaging	All agents
MCP-6	RAG Vector Store	Semantic search over SMSF legislation, ATO rulings, CBA docs	A1 (primary)

Key Shared Tools

TOOL	WHAT IT DOES
`risk_profiler`	Assesses customer risk tolerance (Conservative → Aggressive)
`contribution_cap_calculator`	Tracks concessional/non-concessional caps in real-time
`tax_calculator`	Computes CGT, income tax, franking credits, ECPI
`compliance_checker`	Validates actions against SIS Act (sole purpose, in-house assets, LRBA rules)
`scenario_modeller`	What-if projections for retirement, contributions, market events
`portfolio_analytics`	Performance attribution, drift detection, rebalancing signals
`escalation_router`	Routes to human advisor (financial, legal, accounting) with context
`document_ocr`	Extracts data from uploaded receipts, invoices, statements

6. Use Cases

A1 UC-1: SMSF Knowledge RAG Agent All Phases

PROBLEM: Customers are overwhelmed by inconsistent SMSF information from multiple sources

SOLUTION: RAG-powered knowledge assistant retrieving from curated knowledge base (ATO rulings, SIS Act, CBA docs). Every answer includes source citations. Detects when questions cross into personal financial advice and escalates to a human advisor.

CAPABILITIES: Contextual retrieval · Personalised answers · Source citations · Advice boundary detection · Proactive regulatory alerts

> 📊 Answer accuracy > 98% · Source citation rate 100% · Advice boundary detection > 99%

A2 UC-2: Suitability Assessment Research (M1–M6)

PROBLEM: Customers don't know where to start; unsure if SMSF is right for them; can't compare providers

SOLUTION: Interactive suitability quiz assessing balance (>$200K threshold), experience, time, risk tolerance. Produces scored report with cost-benefit analysis and provider comparison.

CAPABILITIES: Suitability scoring · Cost-benefit analyser · Fund structure recommender · Provider comparison engine

> 📊 Conversion to setup from "Suitable" result: target > 40%

A3 UC-3: Setup & Registration Orchestrator Onboarding (M7–M10)

PROBLEM: Legal complexity, 4–6 week timelines, wet signatures, expensive lawyers

SOLUTION: End-to-end digital orchestration: identity verification → trust deed generation → investment strategy drafting → ATO registration via API. All with e-signatures.

CAPABILITIES: Digital ID verification · Auto-generated trust deeds · AI-assisted investment strategy · ATO API registration

> 📊 Setup completion: < 14 days (from 4–6 weeks) · Abandonment rate < 15%

A4 UC-4: Rollover & Contribution Management Account Setup (M15–M18)

PROBLEM: Rollover delays and uncertainty; confusion around contribution caps; cash flow management

SOLUTION: Digital rollover via SuperStream API with real-time tracking. Automated recurring contributions with cap monitoring — alerts at 80%, 90%, and 100% of limits.

CAPABILITIES: SuperStream rollover · Contribution cap real-time tracking · Direct debit automation · Cash management

> 📊 Zero contribution cap breaches · Rollover completion < 5 business days

A5 UC-5: Investment Strategy & Portfolio Config / Ongoing / Growth

PROBLEM: "Picking assets is the hardest step"; time-consuming management; emotional decisions during downturns

SOLUTION: AI-drafted investment strategy. Portfolio construction with one-click trade execution via CommSec. Drift detection and rebalancing. Market downturn playbooks with emotional guardrails.

CAPABILITIES: Strategy engine · Portfolio construction · Drift detection · Rebalancing · Whole-of-wealth dashboard

> 📊 Strategy compliance > 95% · Panic-sell prevention > 80%

A6 UC-6: Compliance & Record-Keeping Ongoing (always-on)

PROBLEM: Administrative burden; manual tracking causes errors and penalties; regulations change frequently

SOLUTION: Always-on compliance engine with real-time API feeds. Auto-categorises transactions. Continuous SIS Act validation. Proactive regulatory change alerts.

CAPABILITIES: Auto record-keeping · SIS Act monitoring · Regulatory change tracker · Fee transparency · Trustee change management

📊 Compliance breach prevention > 99% · Record automation > 90%

A7 UC-7: Tax Preparation & Lodgement Annual (M22)

PROBLEM: Tax time is the #1 pain point — risk of penalties; reliance on slow accountant process; manual data gathering

SOLUTION: Auto-aggregates all financial records. Generates financial statements and pre-fills the SMSF Annual Return. One-click lodgement via ATO API. Pre-lodgement tax optimisation insights.

CAPABILITIES: Auto-aggregation · Financial statement generation · Annual return pre-fill · One-click lodgement · Tax optimisation

> 📊 Tax return prep: < 2 hours (from days) · Zero penalties · Early lodgement > 70%

A8 UC-8: Audit Coordination Annual (M23–M24)

PROBLEM: Finding auditors is hard; audits are expensive; document preparation is tedious; deadlines are missed

SOLUTION: Auto-appoints from a panel of ASIC-approved auditors. Generates complete audit-ready package. Manages auditor communication and deadline tracking.

CAPABILITIES: Auditor matching · Audit package auto-generation · Communication portal · Deadline management

> 📊 Audit package completeness > 90% · On-time completion > 95%

A9 UC-9: Property Investment (LRBA) Growth (M32)

PROBLEM: Property purchase through SMSF is extremely complex — bare trusts, LRBA rules, strict compliance

SOLUTION: End-to-end guided property investment: eligibility check → LRBA structuring → bare trust setup → lending pre-approval → compliance validation → ongoing tracking.

CAPABILITIES: Property eligibility · LRBA structuring · Bare trust deed generation · Lending integration · Property management

> 📊 Property compliance accuracy: 100%

A10 UC-10: Retirement & Pension Retirement (M33–M35)

PROBLEM: Complex TTR regulations; pension vs. lump sum confusion; ensuring sustainable income

SOLUTION: Retirement scenario modeller (conservative/balanced/growth). Calculates ATO minimum drawdowns. Automates pension payments. Rebalances portfolio from growth → income focus.

CAPABILITIES: Retirement readiness assessment · Scenario modelling · Pension automation · Portfolio rebalancing · TBAR lodgement

> 📊 Minimum drawdown compliance: 100% · Pension setup automation > 85%

A11 UC-11: Life Events & Wind-Up Wind-Up (M36–M39)

PROBLEM: Emotionally challenging; legal complexity in asset distribution; cognitive decline risks; expensive closure

SOLUTION: Activates contingency plans (BDBN). Guides LPR through trustee succession. Strategic asset liquidation with CGT optimisation. Automated final lodgement and ATO deregistration.

CAPABILITIES: Death/illness response · BDBN activation · Asset liquidation · Fund closure workflow · Inactivity management

> 📊 Fund closure: < 90 days · BDBN compliance: 100%

7. Customer Journey → Agent Mapping

	Research (M1–M6)	Onboarding (M7–M10)	Account Setup (M11–M19)	Ongoing Mgmt (M20–M25)	Growth (M26–M32)	Retirement (M33–M39)
A1						
A2						
A3						
A4						
A5						
A6						
A7						
A8						
A9						
A10						
A11						

8. Agent Collaboration Patterns

PATTERN	DESCRIPTION	EXAMPLE
Sequential Handoff	Tasks with strict dependencies chain through agents	A2 → A3 → A4 → A5 (full onboarding)
Parallel Execution	Independent tasks run simultaneously	A7 (tax) + A8 (audit) in parallel
Knowledge-Augmented	Action agents call A1 for regulatory context	A9 asks A1 for property rules mid-flow
Crisis Broadcast	Supervisor activates multiple agents for all customers	Market crash → A5 + A10 + A6
Sensitive Lifecycle	Agent guides; human approves every step	A11 death response + lawyer escalation

9. Human Escalation Policy

TRIGGER	ESCALATION TARGET	BLOCKS AGENT?
Personal financial advice	Financial Advisor	Yes
Legal matter (trust deed, estate)	SMSF Lawyer	Yes
Tax return > $50K liability	Accountant	Yes — review first
Compliance breach detected	Compliance Officer	Yes — halt action
Life event (death / illness)	Senior Advisor (empathy-trained)	No — agent guides
Customer requests human	Preferred channel	Immediate transfer

10. Implementation Roadmap

Phase 1	Q3 2026	**Foundation** — A0 (Supervisor), A1 (Knowledge RAG), A2 (Suitability), MCP-5, MCP-6. SMSF Hub "Learn" tab.
Phase 2	Q4 2026	**Onboarding** — A3 (Setup), A4 (Rollover), MCP-1 (ATO), MCP-3 (Banking), MCP-4 (Doc Gen). "Invest" + "Manage" tabs.

Phase 3	Q1 2027	**Ongoing Mgmt** — A5 (Investment), A6 (Compliance), MCP-2 (CommSec). Whole-of-wealth dashboard.
Phase 4	Q2 2027	**Annual Compliance** — A7 (Tax), A8 (Audit). One-click lodgement, automated audit packaging.
Phase 5	Q3 2027	**Specialist & Lifecycle** — A9 (Property), A10 (Retirement), A11 (Life Events). Full lifecycle. "Optimise" tab.

SMSF Agentic System — Internal Proposal — CBA — 30 March 2026
